

**AUSTIN  
WATER  
SOLUTIONS**

## Experience clean water for life.

The only thing “Hard” about your search should be your water!

We make it easy here at Austin Water Solutions to fix your hard water issue and any other problems your water might have. We get you in contact with a local dedicated sales representative to help you with the process when selecting the best system for your home or commercial building.

We have partnered with Pentair and several leading manufacturers to guarantee your home or building will be filtered by a quality system that has been proven to get the job done.

Austin Water Solutions was founded with the goal of helping every customer get cleaner water at every faucet. With water conditions getting worse, we have taken pride in helping Texas home & business owners feel safe & secure with our high-quality products and customer service. Our knowledge in water treatment and filtration gives us the ability to make quality recommendations that fit your water needs and goals.

Let us help you today!

# Pentair Pro Elite

## 7 Stage Water Treatment System

### Exclusive Pentair Analyzer

Round-the-clock monitoring to determine when resin needs regenerating

Automatically adjusts to changing water conditions

Ensures continuous supply of softened water

Innovative and market-proven conductivity cell design with non-corrosive, 18k-gold-plated probes

Advanced meter and clock controls for ease of use and readability

Conserves both water and regenerant making it an environmentally responsible and cost-effective solution

Limited Lifetime Warranty

Figure 1: System - Specifications: 12" x 48"

Figure 2: Brine Tank - Specifications: 18" x 32"

Included: 6 Stage Tank - Specifications: 8" x 35"

On demand regeneration

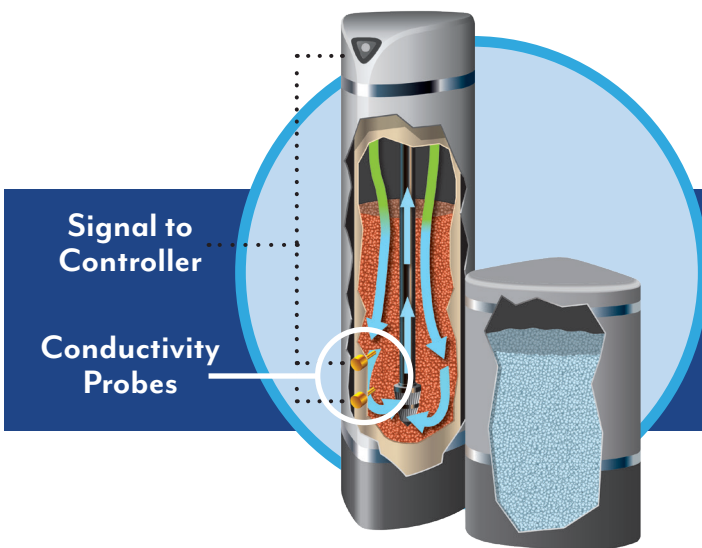

**Regeneration cycles run only when needed**

## Whole House Pentair Pro Elite Water Treatment System

1

### BlackCat® Ion Exchange Resin

Removes calcium, lime, magnesium, and iron

2

### High Capacity Coconut Shell Activated Carbon

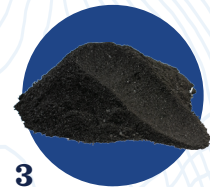

Removes chlorine, unpleasant taste or odor and organic byproducts

3

### Bone Char Carbon

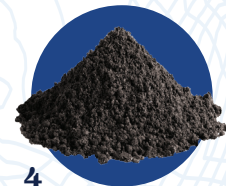

Removes fluoride, copper, cadmium, arsenic, lead, radioactive particles and trihalomethanes (THMs)

4

### Catalytic Carbon

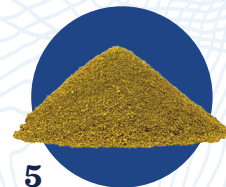

Removes chloramine and hydrogen sulfide

5

### KDF-55

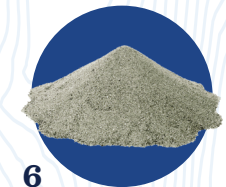

Removes lead, mercury, nickel, chromium, dissolved metals, and controls scale, bacteria, fungi, and algae

6

### NextSand

A rare natural mineral with high filtration performance with a 3-5 micron removal

7

### Gravel Media

Base for water filtration to assure particulates do not migrate into the purified water

# The 400 Series

## Whole Home Filtration Water Treatment System

### System Features

- Programming is stored in memory and will not be lost due to power outages
- LCD screen helps during low light conditions
- Precision cycle positioning using optical sensor
- Time of day back-up for up to 12 hours of power loss
- 10 Year Limited Warranty
- Figure 1: System - Specifications: 62" x 10"
- Figure 2: Brine Tank - Specifications: 15" x 17" x 36"

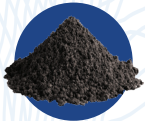

3 Stage Tank  
8" x 35"

### Filtration Levels

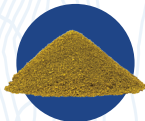

#### BlackCat® Ion Exchange Resin

Removes calcium, lime, magnesium, and iron

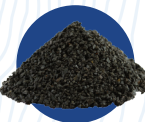

#### Catalytic Carbon

Removes chlorine, chloramine and hydrogen sulfide

#### KDF-55

Removes lead, mercury, nickel, chromium, dissolved metals, and controls scale, bacteria, fungi, and algae

#### Gravel Media

Base for water filtration to assure particulates do not migrate into the purified water
